

Universal Shelf Brackets fit all Rakks wall mounted standards and poles. They are infinitely adjustable and can be installed into standards at any point.

Universal Brackets feature a 1" wide horizontal surface pre-drilled with four holes. Two shelves can join over a single bracket and be secured with screws.

Universal Brackets come in two sizes:

Model	Usable length	Shelf Depth	Load Capacity
BU-009	9"	9" - 11"	60#
BU-012	11 3/4"	12" - 14"	70#

Capacities are based on evenly distributed loads front-to-back with the shelf depths as shown above.

Shorter sizes are available by special order.

### Installation

1. Insert the back tab of the bracket into standard or pole channel (fig A).
2. Carefully twist and rotate the bracket to a 45 degree position (fig B & C). A firm twist may be required. **Caution: do not "force" the bracket into position as this may bend and weaken the back tab of the bracket.**
3. Slide the bracket to the desired height and lock the bracket into the horizontal position (fig D).
