

Universal Bracket Information & Installation

Universal Shelf Brackets fit all Rakks wall mounted standards and poles. They are infinitely adjustable and can be installed into standards at any point.

Universal Brackets feature a 1" wide horizontal surface pre-drilled with four holes. Two shelves can join over a single bracket and be secured with screws.

Universal Brackets come in two sizes:

<u>Model</u>	<u>Usable length</u>	<u>Shelf Dept</u>	<u>Load Capacity</u>
BU-009	9"	9" - 11"	70#
BU-012	11 3/4"	12" - 14"	60#

Capacities are based on evenly distributed loads front-to-back with the shelf depths as shown above.

Shorter sizes are available by special order.

Installation

1. Insert the back tab of the bracket into standard or pole channel (fig A).
2. Carefully twist and rotate the bracket to a 45 degree position (fig B & C). A firm twist may be required. **Caution: do not "force" the bracket into position as this may bend and weaken the back tab of the bracket.**
3. Slide the bracket to the desired height and lock the bracket into the horizontal position (fig D).
